About PHARMACY

- Pharmacy laboratory technician is a healthcare professional, who shall apply to all sections of the pharmacy care, especially in public and hospital pharmacies, analysis laboratories medicines or in the manufacture of medicines.
- It's main task is to provide pharmacy care: they prepare various dosage forms, dispense over-the-counter medicines, medical supplies or homeopathic medicines
 - This department can also be applied abroad.

Why this department? -

Paula

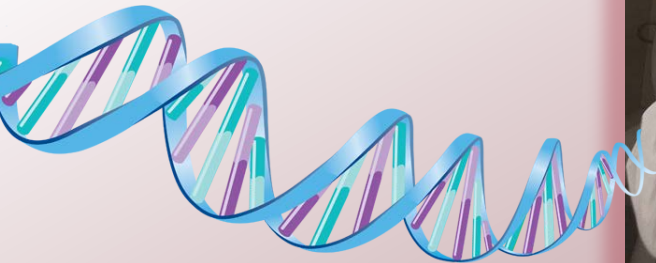

- I didn't know what kind of high school to choose but in the end my parents convinced me and I applied to this school.
- I chose this branch because I wanted to help people and I always enjoyed selling various things.
- I'm happy as I have decided, because this branch will prepare me properly for a job that would fulfill and entertain me to college, where I would train to become a doctor or pharmaceutical laboratory assistant.

Why this department

-**Simona**

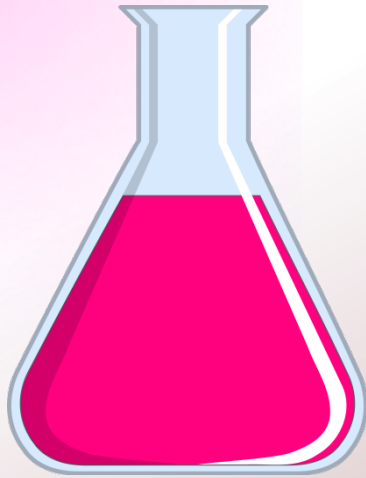

- I would very much like to become a doctor in the future and help people. I would like to have my own pharmacy.
- At elementary school, I enjoyed chemistry and biology, which is also the reason why I chose this school to move on with it.
- I really liked this school when I was at DOD and it is well equipped in terms of laboratories and people here are so nice and kind.
- This is why I chose this school and this field of study.

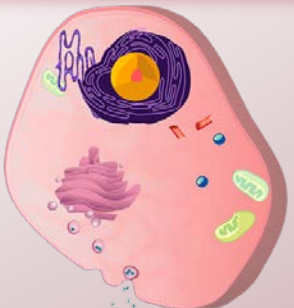

Why this department? -

Petra

- I study at medical high school in Trnava, because I want to have my own pharmacy and help people.
- From an early age, I wanted to work in healthcare. However, I am afraid of injections and blood, so I decided to go into this field.
- So far, I enjoy this school very much and I don't regret my decision. I'm looking forward to my future in the pharmacy.

- The main task of professors is to prepare students for a good future. Our school is looking for educated professors who will give students the best knowledge they have. They will do and say everything necessary to the students. They prepare us for graduation and after it for college.
- Although we are only studying at this school for the first year, we know that it will give us a lot.

Thank you for your attention!
